"Pressestimmen **Well presented** and bridges many gaps between different observational methods. (Science)Astonishing...**a promising debut** (New Scientist 2018-03-24)Natalie Starkey has packed this book full of information on the minor bodies of our solar system, which are key to understanding how things got the way they are today - **a must-have** for anyone interested in where we came from. (Matt Taylor, ESA Rosetta Project Scientist)Catching Stardust builds a strong case for why continuing to explore comets and asteroids is **so important** to understanding our past and in shaping our future. (Jessica Sunshine, Professor of Astronomy, University of Maryland)An **action-packed narrative** that really draws in the reader to the thrills and challenged of exploring the true nature of our Solar System. (Lucy McFadden, Emerita at NASA Goddard Space Flight Centre)A fast-paced journey through time and space under the enthusiastic guidance of space geologist Natalie Starkey. **Highly recommended.** (Monica Grady, Professor of Planetary Sciences at The Open University) Werbetext Takes us up close and personal with comets, and explains how we can use these ancient voyagers to understand our place in the Solar System.
