L'architecture. NET représente réellement une (r)évolution majeure pour les développeurs et les administrateurs de systèmes. Le confort d'utilisation, la sécurité, la cohérence des applications s'en trouvent largement améliorés mais l'infrastructure. NET est si colossale qu'elle va nécessairement bouleverser les méthodes de développement, imposant un apprentissage considérable et une approche progressive. Ce deuxième titre de la collection. NET PRESS vous fait découvrir le tout nouveau champ d'action offert aux développeurs d'applications Windows : interagir de façon étroite avec le système, écrire des procédures de fenêtres, intercepter ou générer des messages Windows, travailler directement avec le système graphique GDI+..., c'est désormais possible avec VB .NET. Si vous connaissez les éléments de base du langage, Gérard Frantz vous guide pas à pas dans la création d'applications Windows puissantes et fiables grâce à l'outil de développement Visual Studio.NET. Il fournit une présentation détaillée des formulaires et de leur utilisation au travers l'étude des menus, des boîtes de dialogue, des contrôles. Il vous apprend à créer vos propres contrôles et à exploiter le nouveau système graphique de Windows : le GDI+. Il vous montre comment utiliser les fonctions graphiques pour réaliser l'impression de documents. Il vous dévoile enfin comment finaliser votre application pour un système défini ou réaliser une application d'installation pour son déploiement. Ingénieur civil des mines, Gérard Frantz est expert en systèmes et développement Windows qu'il pratique depuis la toute première version en 1984. Il a réalisé de nombreux développements d'applications pour Windows, en particulier avec les différentes versions de Visual Basic. Il anime régulièrement des séances de formation pour développeurs ou concepteurs d'applications et participe à des séminaires internationaux de développeurs Windows, Il conseille également les entreprises pour la réalisation de leurs projets et les aide à comprendre les implications des nouvelles technologies dans leurs choix stratégiques. Grâce à son expertise dans les systèmes de développement de Microsoft, basée sur un suivi permanent des évolutions des systèmes Windows, il leur permet de disposer d'une vue d'ensemble sur les architectures actuelles et à venir.
