Ce livre propose une présentation de chaque dermatose avec une importante description du diagnostic histopathologique. Chaque maladie est abordée selon une structure identique, claire et précis, qui facilite la lecture et la compréhension. Le lecteur sera également frappé par l'impressionnante richesse iconographique. Outil d'apprentissage, ce livre permet d'acquérir rapidement des compétences dans ce domaine et entraîne à poser un diagnostic dès le premier coup d'oeil après avoir parcouru les diagnostics différentiels bien présentés. Un solide bagage dans le domaine de la dermatopathologie reste bien sûr essentiel pour arriver à la conclusion d'un cas de dermatose inflammatoire ou de tumeur cutanée. Destiné principalement aux dermatologues et aux dermatopathologues en formation, ce livre sera utile à un plus large public intéressé par la dermatopathologie.
